DETAILED ACTION

Page 2

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1 and 5 are drawn to an isolated RAP polypeptide of SEQ ID: 13 and antigenically effective portion thereof, and a carrier, classified in class 530, subclass 324.
- II. Claims 2-3 are drawn to an isolated nucleic acid molecule consisting of a coding sequence for the RAP polypeptide, wherein the sequence is SEQ ID: 12 or degenerate variant thereof, classified in class 536, subclass 23.7.
- III. Claim 4 is drawn to method of treating a *Staphylococcus* infection classified in class514, subclass 12.
- IV. Claim 6 is drawn to method of preventing a Staphylococcus aureus infection classified in class 424, subclass 237.1.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions I and II are related as products/compositions. The products/compositions are distinct from each other as claimed because they are made of different components (nucleic acids versus amino acids). Moreover, the nucleic acid molecule is not required to produce the polypeptide because the polypeptide can be isolated from nature or made synthetically. As such, the products/compositions are distinct each from the other.
- 3. Inventions (I II) and (III IV) are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for

Art Unit: 1645

using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the RAP polypeptide can be alternatively used in materially different methods such as purification of proteins on affinity columns and the RAP nucleic acid molecule can be used in hybridization binding studies. As such, the products and process of using products are distinct each from the other.

- 4. Inventions III and IV are related as processes of use. The methods are distinct, each from the other, because they have different goals as reflected in the preamble (treating versus preventing) and method steps (subject infected versus subject uninfected). As such, the methods are distinct each from the other as claimed.
- 5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examiner even though the requirement be traversed (27 CFR 1.143).
- 6. The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and a product claim is subsequently found allowable, withdrawn process claims that depend from or otherwise include all the limitations of the allowable product claim will be rejoined in accordance with the provisions of MPEP § 821.04. Process claims that depend from or otherwise include all the limitations of the patentable product will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier. Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

Art Unit: 1645

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103, and 112. Until an elected product claim is found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowed product claim will not be rejoined. See "Guidance on Treatment of Product and Process Claims in light of *In re Ochiai, In re Brouwer* and 35 U.S.C. § 103(b)," 1184 O.G. 86 (March 26, 1996). Additionally, in order to retain the right to rejoinder in accordance with the above policy, Applicant is advised that the process claims should be amended during prosecution either to maintain dependency on the product claims or to otherwise include the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.**

Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

- 7. These inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, as shown by their different classification and in the absence of restriction would place an undue burden on the examiner, restriction for examination purposes as indicated is proper.
- 8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with CFR 1.48(b) if one or more of the currently

Application/Control Number: 09/839,695

Art Unit: 1645

Page 5

named inventors is no longer an inventor of at least one claim remaining in the application. Any

amendment of inventorship must be accompanied by a request 37 CFR 1.48(b) and by the fee

required under 37 CFR 1.17(I).

9. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Tammy K. Field whose telephone number is (571) 272-0856.

The examiner can normally be reached on Monday-Friday from 7am-4:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Lynette Smith can be reached at (571) 272-0864.

Papers relating to this application may be submitted to Technology Center 1600 Group

1640 by facsimile transmission. The faxing of such papers must conform to the notice published

in the Official Gazette, 1096 OG 30 (November 15, 1989). The fax phone number for the

organization where this application or proceeding is assigned is (703) 872-9306 for regular

communications and After Final communications.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov./. Should you have questions on access to the Private

PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
